RISK FACTORS

Investing in the DBH First Mutual Fund (hereinafter the Fund) bears certain risks that investors should carefully consider before investing in the Fund. Investment in the capital market and in the Fund bears certain risks that are normally associated with making investments in securities including loss of principal amount invested. There can be no assurance that the Fund will achieve its investment objectives. The Fund value can be volatile and no assurance can be given that investors will receive the amount originally invested. When investing in the Fund, investors should carefully consider the risk factors outlined below, which are not necessarily exhaustive or mutually exclusive:

- 1. General:** There is no assurance that the Fund will be able to meet its investment objective and investors could potentially incur losses, including loss of principal when investing in the Fund. Investment in the Fund is not guaranteed by any government agency, the Sponsor or the AMC. Mutual funds and securities investments are subject to market risks and there can be no assurance or guarantee that the Fund's objectives will be achieved. As with any investment in securities, the Net Asset Value of the Fund may go up or down depending on the various factors and forces affecting the capital markets. Past performance of the Sponsors and their affiliates and the AMC do not indicate the future performance of the Fund. Investors should study this Offer Document carefully in its entirety before investing.
- 2. External Risk Factor:** Performance of the Fund is substantially dependent on the macroeconomic situation and in the capital market of Bangladesh. Political and social instability may have an adverse effect on the value of the Fund's assets. Adverse natural climatic condition may impact the performance of the Fund.
- 3. Market Risk:** The Bangladesh capital market is highly volatile and mutual fund prices and prices of securities can fluctuate significantly. The Fund may lose its value or incur a sizable loss on its investments due to such market volatility. Stock market trends indicate that prices of majority of all the listed securities move in unpredictable direction which may affect the value of the Fund. Furthermore, there is no guarantee that the market prices of the units of the Fund will fully reflect their underlying Net Asset Values.
- 4. Concentration Risk:** Due to a limited number of listed securities in both the DSE and CSE, it may be difficult to invest the Fund's assets in a widely diversified portfolio as and when required to do so. Due to a very thin secondary fixed income/debt market in Bangladesh, it would be difficult for the Fund Manager to swap between asset classes, if and when required. Limited options in the money market instruments will narrow the opportunity of short term or temporary investments of the Fund which may adversely impact the returns.
- 5. Dividend Risk:** Despite careful investment selection of companies in the Fund, if the companies fail to provide the expected dividend or fail to disburse the dividends declared in a timely manner, this will impact the income of the Fund and the overall return of the Fund.
- 6. Underlying Liquidity Risk:** For investing in Pre-Public Offer Placement securities i.e. in unlisted equity securities by the Fund, may involve liquidity risk. In addition, market conditions and investment allocation may have an impact on the ability to sell securities during periods of market volatility. Debt securities, while somewhat less liquid, lack a well-developed secondary market, which may restrict the selling ability of the Fund and may lead to the Fund incurring losses till the security is finally sold. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Fund incurring losses till the security is finally sold.
- 7. Investment Strategy Risk:** Since the Fund will be an actively managed investment portfolio, the Fund is subject to management strategy risk. Although the AMC will apply its investment process and risk minimization techniques when making investment decisions for the Fund, there can be no guarantee that such process and techniques will produce the desired outcome.

8. **Credit Risk:** Since the Fund will seek to also invest as per the Mutual Fund Regulations (2001) in both equity and fixed income securities, the credit risk of the fixed income issuers is also associated with the Fund. Investment in fixed income securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.
9. **Interest Rate Risk:** The Net Asset Value (NAV) of the Fund, to the extent invested in Debt and Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the Fund is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates. In addition, zero coupon securities do not provide periodic interest payments to the holder of the security; these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio.

THE MUTUAL FUND IS NOT GUARANTEEING OR ASSURING ANY RETURNS

2. BACKGROUND

2.1 FORMATION OF DBH FIRST MUTUAL FUND

A typical mutual fund is an investment fund that pools money from unit holders and invests in a diversified portfolio of securities. The mutual fund industry has a long history tracing as far back as the early 1800's with its humble beginnings generally considered to be in Europe. Today, mutual funds are widely considered to offer investors attractive risk adjusted returns by pooling assets for various investment purposes. The mutual fund industry came into wide public prominence in the mid 1980's and during the 1990's technology boom with fund managers when the likes of Michael Price and Peter Lynch, were considered the new investment gurus with their impressive mutual fund returns. Since then the industry has gone through peaks and troughs but have largely managed to flourish and grow both in the developing market and developed markets of the world. The mutual fund industry in Bangladesh is at its early or nascent stages, offering room for greater growth and product innovation. Investing in a mutual fund especially for retail investors should be an attractive proposition mainly due to:

- Professional Management – mutual funds are actively managed by qualified investment professionals with an objective to limit downside risk and improve the upside potential with active management.
- Diversification Benefit – mutual funds are generally diversified pooled investment which is expected to reduce the risk per adjusted return for the small and retail investors.
- Efficiency and Economies of Scale – mutual funds by pooling together a large portfolio can negotiate competitive commissions and fees, which results in lower costs to the investors.
- Transparency – mutual funds are highly regulated investment vehicles and operate under strict rules and regulations by the Securities and Exchange Commission.

Delta Brac Housing Corporation (DBH) has decided to be one of the first non-banking financial institution in Bangladesh to sponsor and launch a mutual fund. The Board of Directors and senior management of DBH strongly believe sponsoring a mutual fund is an efficient and effective means of expanding its capital market investment alternatives that will result in an attractive and stable income source for DBH and lead to greater development of the capital markets in Bangladesh.

To further this initiative, LR Global Bangladesh Asset Management Company will be the Asset Manager for DBH First Mutual Fund, with Bangladesh General Insurance Company (BGIC) as the Trustee of the Fund and Standard Chartered Bank (SCB) as the Custodian of the Fund.

2.2 RATIONALE FOR LAUNCHING PROPOSED MUTUAL FUND UNDER CURRENT CAPITAL MARKET CONDITIONS

In contrast to the global meltdown in world markets, the capital market in Bangladesh has remained relatively unscathed compared to mostly negative and sluggish growth for most of the world equity indices. As of September 2009, DSE turnover stood at approximately Tk. 735 crore which is a 53% increase from September 2008 and 71% increase from December 2008, respectively. As the Bangladesh capital markets continue to evolve and reach new heights, the mutual fund industry offers significant growth potential. By most measures the current mutual funds in the market, which number approximately 20 in total, represent a very small percentage of the total domestic market capitalization; thus there exists greater scope for market growth in the mutual fund sector. As a number of mutual funds are currently in process to come to market, a paradigm shift will take place with institutions and professional money managers representing a more sizable and reasonable proportion of the market versus retail and short term investors. This shift will help to reduce unnecessary market volatility, lead to more rational price discovery and limit the influence of rumor-based trading in the market on a day-to-day basis. This growth and maturity in the market is necessary to attract and inject stable and long-term domestic and foreign institutional capital into the markets. Furthermore, the SEC and other market regulators and industry veterans view responsible expansion of the mutual fund industry as

key driver for further development of the capital markets in Bangladesh. With the above framework in mind, DBH, a leading non-banking financial institution (NBFI) in Bangladesh has joined forces with LR Global Bangladesh to launch one of the first NBFI sponsored mutual fund.

2.3 ADVANTAGES OF INVESTING IN DBH FIRST MUTUAL FUND

Generally investment in mutual funds provides certain incremental advantages when compared to investment made directly in individual securities in the capital market. Highlighted below are some of the advantages that investors may benefit from when investing in a mutual fund:

1. Mutual funds generally lower investment risk for small and retail investors through diversification into multiple sectors, companies, securities and via investing in various asset classes. The fund manager will attempt to maximize return for a given level of risk and always conduct a balance in his risk-return tradeoff.
2. Mutual funds through its diversified pool of investments will provide small investors access to returns of the wider market, which will be if not impossible very costly for retail investors to achieve.
3. Greater participation of mutual funds will add to enhanced liquidity to the overall market and, since most mutual funds are long term investment vehicles, this will create price stability and better price discovery and reduce short term volatility in market.
4. The Fund's performance will benefit from the LR Global Bangladesh (AMC) proprietary investment process and research tools for both fundamental and technical analysis; AMC has a highly skilled in-house research team who are experienced investment professionals dedicated to analyzing in depth the Bangladesh stock market, its scripts and the impact of the broader macro factors that impact the markets.
5. As the Fund will be professionally managed, investors will be relieved from the emotional stress associated with day-to-day management of individual investment portfolio.
6. The investors will be able to save significantly in transaction costs as he/she will have access to a large number of securities by purchasing a single unit of the mutual fund.
7. Income will be tax free up to a certain level, as permitted under the Finance Act.
8. Investment in the Fund would qualify for investment tax credit under section 44(2) of the Income Tax Ordinance 1984.
9. Management and operations of mutual funds are subject to strict regulations from the SEC and the Sponsor appointed Trustee, both of whom closely monitor the performance of the Fund. The laws governing mutual funds require exhaustive disclosure to the regulator and general public.
10. In Bangladesh, mutual funds enjoy a 10% (ten percent) reserved quota for all Initial Public Offerings (IPOs). IPOs in Bangladesh have historically performed very well relative to the market index and have positively contributed to mutual fund performance.

2.4 LIFE OF THE FUND

The Fund will be a closed-end mutual fund of 10 (Ten) years tenure, established with a view to broaden the base of investment and develop the capital market.

The Trust Deed also provides the flexibility to the unit-holders to extend the tenure of the Fund beyond the initial 10 years as per SEC regulations.

2.5 SIZE, FACE VALUE AND MARKET LOT OF THE FUND

- Total Fund fixed at 12,00,00,000 (twelve crore) units of Tk. 10 each in totaling Tk. 120,00,00,000 (Taka one hundred and twenty crore)
- The Sponsor's portion of the Fund is 2,00,00,000 (two crore) units of Tk. 10 each in totaling Tk. 20,00,00,000 (Taka twenty crore)

As per section 58 of the সিকিউরিটিজ ও এক্সচেঞ্জ কমিশন (মিউচুয়াল ফান্ড) বিধিমালা, ২০০১, the valuation policy of investment of the Fund need to be approved by the Commission in the Trust Deed as follows:

- 1) For listed securities, the average quoted closing market price on the stock exchanges on the date of valuation shall form the basis of any calculation of Net Asset Value of such securities in the portfolio of the Fund;
- 2) The Fund shall fix the valuation method for each of the schemes subject to prior approval of the Commission;
- 3) The Fund shall follow the method approved by the Commission for valuation of the non-listed investment, if any, and the Asset Management Company and the Trustee shall periodically review the value of such investment. The auditors shall comment on such investment in the annual reports of the Fund;

- 5) For securitized debts, debentures, margin or fixed deposits, the accrued interest on such instruments on the date of valuation shall be taken into account in any calculation of Net Asset Value of such securities in the portfolio of the Fund.

Following the valuation criteria as set forth above, the Fund will use the following formula to derive NAV per unit:

$$\text{Total NAV} = V_A - L_T$$

$$\text{NAV per unit} = \frac{\text{Total NAV}}{\text{No. of units outstanding}}$$

V_A = Value of Total Assets of the Fund as on date

L_T = Total liabilities of the Fund as on date

V_A = Value of all securities in vault + Value of all securities placed in lien + Cash in hand and at bank + Value of all securities receivables + Receivables of proceeds of sale of investments + Dividend receivables, net of tax + interest receivables, net of tax - Issue expenses amortized as on date - Printing, publication and stationery expenses amortized as on date.

4. RISK CONSIDERATIONS

4.1 RISK FACTORS

Investing in the DBH First Mutual Fund (hereinafter the Fund) bears certain risks that investors should carefully consider before investing in the Fund. Investment in the capital market and in the Fund bears certain risks that are normally associated with making investments in securities. There can be no assurance that the Fund will achieve its investment objectives. The Fund value can be volatile and no assurance can be given that investors will receive the amount originally invested. When investing in the Fund investors should carefully consider the risk factors outlined below, which are not necessarily exhaustive or mutually exclusive:

1. **General:** There is no assurance that the Fund will be able to meet its investment objective and investors could potentially incur losses, including loss of principal when investing in the Fund. Investment in the Fund is not guaranteed by any government agency, the Sponsor or the AMC. Mutual funds and securities investments are subject to market risks and there can be no assurance or guarantee that the Fund's objectives will be achieved. As with any investment in securities, the Net Asset Value of the Fund may go up or down depending on the various factors and forces affecting the capital markets. Past performance of the Sponsors and their affiliates and the AMC do not indicate the future performance of the Fund. Investors should study this Offer Document carefully in its entirety before investing.
2. **External Risk Factor:** Performance of the Fund is substantially dependent on the macroeconomic situation and in the capital market of Bangladesh. Political and social instability may have an adverse effect on the value of the Fund's assets. Adverse natural climatic condition may impact the performance of the Fund.

3. **Market Risk:** The Bangladesh capital market is highly volatile and mutual fund prices and prices of securities can fluctuate significantly. The Fund may lose its value or incur a sizable loss on its investments due to such market volatility. Stock market trends indicate that prices of majority of all the listed securities move in unpredictable direction which may affect the value of the Fund. Furthermore, there is no guarantee that the market prices of the units of the Fund will fully reflect their underlying Net Asset Values.
4. **Concentration Risk:** Due to a limited number of listed securities in both the DSE and CSE, it may be difficult to invest the Fund's assets in a widely diversified portfolio as and when required to do so. Due to a very thin secondary fixed income/debt market in Bangladesh, it would be difficult for the Fund Manager to swap between asset classes, if and when required. Limited options in the money market instruments will narrow the opportunity of short term or temporary investments of the Fund which may adversely impact the returns.
5. **Dividend Risk:** Despite careful investment selection of companies in the Fund, if the companies fail to provide the expected dividend or fail to disburse the dividends declared in a timely manner, this will impact the income of the Fund and the overall return of the Fund.
6. **Underlying Liquidity Risk:** For investing in Pre-Public Offer Placement securities i.e. in unlisted equity securities by the Fund, may involve liquidity risk. In addition, market conditions and investment allocation may have an impact on the ability to sell securities during periods of market volatility. Debt securities, while somewhat less liquid, lack a well-developed secondary market, which may restrict the selling ability of the Fund and may lead to the Fund incurring losses till the security is finally sold. While securities that are listed on the stock exchange carry lower liquidity risk, the ability to sell these investments is limited by the overall trading volume on the stock exchanges and may lead to the Fund incurring losses till the security is finally sold.
7. **Investment Strategy Risk:** Since the Fund will be an actively managed investment portfolio, the Fund is subject to management strategy risk. Although the AMC will apply its investment process and risk minimization techniques when making investment decisions for the Fund, there can be no guarantee that such process and techniques will produce the desired outcome.
8. **Credit Risk:** Since the Fund will seek to also invest as per the Mutual Fund Regulations (2001) in both equity and fixed income securities, the credit risk of the fixed income issuers is also associated with the Fund. Investment in fixed income securities are subject to the risk of an issuer's inability to meet interest and principal payments on its obligations and market perception of the creditworthiness of the issuer.
9. **Interest Rate Risk:** The Net Asset Value (NAV) of the Fund, to the extent invested in Debt and Money Market securities, will be affected by changes in the general level of interest rates. The NAV of the Fund is expected to increase from a fall in interest rates while it would be adversely affected by an increase in the level of interest rates. In addition, zero coupon securities do not provide periodic interest payments to the holder of the security, these securities are more sensitive to changes in interest rates. Therefore, the interest rate risk of zero coupon securities is higher. The AMC may choose to invest in zero coupon securities that offer attractive yields. This may increase the risk of the portfolio.

THE MUTUAL FUND IS NOT GUARANTEEING OR ASSURING ANY RETURNS

4.2 EXPECTED MARKET PERFORMANCE OF THE FUND

- 1) Mutual fund industry is still at its infancy in Bangladesh and represents less than 3% of market capitalization and currently a significant demand for the product exists. Therefore it is possible that demand for the DBH First Mutual Fund units will be substantially over the supply of units.
- 2) Brand name of Delta Brac Housing Finance Corporation Limited as a Sponsor, Bangladesh General Insurance Company Limited as a Trustee and Standard Chartered Bank as a Custodian, and their respective track record in the past may motivate investors to invest in this Fund.
- 3) LR Global Bangladesh Asset Management Company Limited, the most experienced and highly qualified investment management team in Bangladesh as a new-generation Asset Management Company (AMC) would attract investors to invest in this Fund.

4.3 WHO TO INVEST AND HOW MUCH TO INVEST

- 1) Individuals who do not have tolerance of bearing risk and know nothing about the functioning of the capital market need not apply for the units of the Fund.
- 2) Individuals who are looking for long-term capital growth and dividend payment and are comfortable with the risk associated with equity investments should consider investing in the Fund.
- 3) An individual should also consider investing in the Fund if he/she can accept variability of returns, have a moderate to high tolerance for risk and is planning to invest in the Fund over the medium to long-term.
- 4) Considering other factors like the investment opportunities available in the market, return expectation, income level and consumption pattern, one may put only a limited portion of his/her total portfolio into the Fund.

5.3 ASSET MANAGER OF THE FUND

LR Global has a long history of deep and extensive experience in investments in frontier countries including Bangladesh. LR Global was incubated within Rockefeller & Co., the family office started by John D. Rockefeller in 1891. LR Global Partners was founded in June 1997 by our principals, Leon Levy, his partner Jack Nash, and the Rockefeller family. It was intended as an extension of Murray and Don's successful strategy of investing in deeply undervalued securities in developing markets. Leon Levy (1926-2003) was, according to Forbes magazine, a "Wall Street investment genius and prolific philanthropist," who helped create both mutual funds and hedge funds. He co-founded Oppenheimer & Co. in 1959, where he started dozens of mutual funds that, at his death, had grown to more than \$120 billion. In 1982 he sold Oppenheimer to UK's Mercantile and co-founded Odyssey Partners, a private investment partnership. Its success helped it grow into a \$3 billion hedge fund before it was dissolved in 1997.

LR Global was built upon the Rockefeller tradition, Murray and Don's investment philosophy, and a disciplined investment process that continues to this day. Murray passed away in 2006, but Don continues with a seasoned management team that is conservative in its outlook and approach. Our competitive advantage continues to be our investment process and our unique ability to leverage long-standing knowledge in frontier markets to source undiscovered opportunities. Currently, we have offices or strategic partners in Vietnam, Cambodia, and Bangladesh with investments in over 15 frontier markets. Most of the principals worked at

Rockefeller & Co. at some point in their careers. Don LaGuardia was a portfolio manager, Sean Wilson was their former Head of Research, and Bill Asmundson was CEO of Rockefeller & Co. More recently, Reaz Islam joined the team last year after a distinguished 18-year career at Citigroup, with the last 12 years as the CEO of their Fixed Income Alternatives group and Senior Manager of Citigroup.

In 2008, the Principal's of LR Global founded **LR Global Bangladesh Asset Management Company**, a Dhaka based investment firm focused on providing a full range of investment products including management of equity portfolios for onshore and offshore investors.

Investment Objective

Our investment objective is to provide superior risk adjusted returns over a medium to long term by investing in strong companies, with good management and at a great price by leveraging our time tested investment process. The investment specialists seek to provide consistent out-performance over time to its investors with a strong attention to risk management. We believe our investment process, grounded in the importance of fundamental research, allows our experienced investment professionals to identify quality growth opportunities in the capital markets.

Investment Philosophy

Our investment philosophy is that consistent and attractive risk adjusted returns can only be generated by applying a robust investment process that identifies macro economic trends, sector drivers, expert company analysis, and effective capital allocation on an ongoing basis. It was our guiding philosophy 12 years ago - and it is our guiding philosophy today.

Investment Process

Our investment process has been developed consistent with our investment objectives and investment philosophy. The key elements of our process are as follows:

1. **Top down and bottom up** - Our investment portfolios are constructed employing our proprietary methodology of a top-down overlay of the economy, sector and markets risks and bottom-up rigorous fundamental analysis. Our Research team focuses on understanding individual companies as businesses rather than simply as stocks by conducting independent research. Our top down and bottom up investment approach is further enhanced by our proprietary technical trading platform. We combine time-tested investment specialization, industry knowledge and active risk management to seek investment opportunities that we believe will be promising over time. We do not restrict our analysis to the traditional framework of industry buckets. Instead, we employ a truly comprehensive process that aims to identify the best performing companies in a given industry. As investment managers, our mission is to take advantage of these opportunities while effectively managing and diversifying the risks-on behalf of our clients. Our investment process is a marriage of traditional fundamental security valuation and proprietary quantitative risk-control techniques.
2. **Risk Management** - The investment portfolio is actively monitored on a regular basis and re-balanced as required. While we pride ourselves on taking a long-term approach to investing our client assets, our process is fluid and dynamic. Our portfolios are constantly monitored using and strictly adhering to our research and analysis driven process. While we do not have a mechanical sell discipline, we will typically either eliminate or trim positions when they no longer meet our three critical factors as stated in our investment objectives. Moreover, we perform a rigorous review on any investment that declines materially in price. Importantly, our emphasis upon downside protection leads us to investments in companies with attractive valuations. We believe this emphasis limits our loss potential should the catalyst not materialize. We embrace the notion that security prices must follow company fundamentals. Simply put, a stock's weight in a portfolio should be directly related to its qualitative and quantitative value, rather than its weight in an index. However, stock price/valuation

and liquidity is equally important. We attempt to build downside protection into our process by evaluating and quantifying the risks versus the reward opportunity of every investment in the portfolio. This is achieved by analyzing: free cash flow; the intrinsic or asset value of the company; price-to-sales and/or price-to-tangible book value. This analysis helps us to assess downside risk should unexpected adverse events unfold.

- 3. Valuation process** - Our corporate finance approach and cash flow focus helps us better identify potential investments. Our analysis will often include breaking down a company's financial results by business segment to determine a valuation for the whole business. Importantly, our valuation analysis focuses upon absolute valuations, rather than relative valuations; we believe this process focus helps to limit losses and downside risk. Qualitative measures and quantitative measures assist us in determining attractive investments. While evaluating management strength and changes within a company's business are examples of qualitative measures, quantitative measures may include various financial ratios including price-to-cash flow, price-to-sales and price-to-book analysis. All of these elements contribute to assist us in determining the appropriate valuation for an investment and its respective return expectations.
- 4. Forward looking analysis** - We do not believe that investing after positive or negative news is an investment discipline. Rather, we seek to uncover the factors that will drive business improvement three months to a year in advance and take positions accordingly. So that, portfolios can fully benefit when these inflection points and catalysts emerge and are recognized. The ingredients for change can come in many forms. For example, there are company specific catalysts, i.e. a new management team, a shift in business strategy, or a restructuring to "unleash" hidden assets. Change can also come from an improving outlook for an entire industry or a changed regulatory framework. We pride ourself upon our ability to think independently and identify unique opportunities.
